Maintainer Sebastien Plutniak <sebastien.plutniak@posteo.net>

Description A 'Shiny' application to access the functionalities and datasets of the 'archeofrag' package for spatial analysis in archaeology from refitting data. Quick and seamless exploration of archaeological refitting datasets, focusing on physical refits only. Features include: built-in documentation and convenient workflow, plot generation and export, anomaly detection in the spatial distribution of refitting connection, exploration of spatial units merging solutions, data export to the 'fabryka' application for spatial orientation analysis, simulation of archaeological site formation processes, support for parallel computing, R code generation to re-execute simulations and ensure reproducibility, code generation for the 'openMOLE' model exploration software. A demonstration of the app is available at <<https://analytics.huma-num.fr/archeofrag/>>.

License GPL-3

archeofrag.gui	<i>archeofrag.gui</i>
----------------	-----------------------

Description

Launch the archeofrag.gui application

Usage

```
archeofrag.gui(n.cores=NULL)
```

Arguments

n.cores	integer. The number of cores to use for parallel execution. If NULL, half of the available cores are registered.
---------	--

Details

This function launches the ‘archeofrag.gui’ application.

Note that the optional determination of graph planarity in the [archeofrag](#) package requires the RBGL package.

Value

Launch the ‘archeofrag.gui’ R Shiny application.

Author(s)

Sebastien Plutniak <sebastien.plutniak at posteo.net>
